# PowerLogic BCPM Technical Data Sheet

The PowerLogic BCPM is a highly accurate, full-featured metering product designed for the unique, multi-circuit and minimal space requirements of a high performance power distribution unit (PDU) or remote power panel (RPP).

It offers class 1 (1 %) power and energy system accuracy (including 50 A or 100 A CTs) on all branch channels. The BCPM monitors up to 84 branch circuits and the incoming power mains to provide information on a complete PDU. Full alarming capabilities ensure that potential issues are dealt with before they become problems.

#### **Applications**

- Maximise uptime and avoid outages
- Optimise existing infrastructure
- Improve power distribution efficiency
- Track usage and allocate energy costs
- Enable accurate sub-metering

BCPMA084S

PLSED308011EN

1

#### The solution for

Markets that can benefit from a solution that includes PowerLogic BCPM series meters:

- Data centres
- Buildings

#### **Benefits**

The flexible BCPM fits any PDU or RPP design and supports both new and retrofit installations. It has exceptional dynamic range and accuracy, and optional feature sets to meet the energy challenges of mission critical data centres.

# Competitive advantages

- Fit any PDU or RPP design for both new and retrofit projects
- Class 1.0 system accuracy
- Ethernet communication

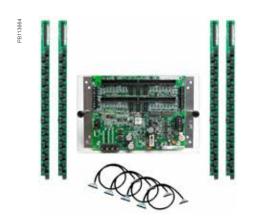

#### Power management solutions

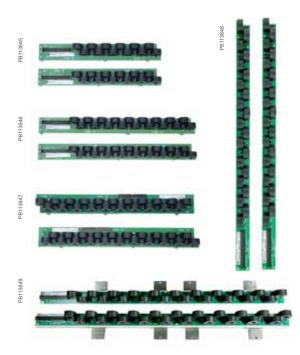

Schneider Electric provides innovative power management solutions to increase your energy efficiency and cost savings, maximise electrical network reliability and availability, and optimise electrical asset performance.

#### Conformity of standards

- ANSI C12.1
- IEC 61010-1
- IEC 62053-21 Class 1
- UL508

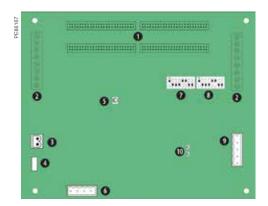

#### Main characteristics

- Monitor up to 84 branch circuits with a single BCPM.
- · Ideal for installation in both new PDUs and retrofit projects
- New installations:
  - BCPM with solid core CTs monitors up to 84 branch circuits using 2 or 4
    CT strips. Solid core CTs are rated to 100 A CTs and are mounted on strips
    to simplify installation. CT strips are available with 12, 18 or 21 CTs per
    strip on 18 mm spacings. 21 CT strips with 3/4in or 1in spacings are also
    available.
- Retrofit projects:
- BCPMSC with split-core CTs is ideal for retrofits. Any number of split-core CTs, up to 84 maximum, can be installed with a single BCPM. Three sizes of CT are supported (50 A, 100 A, and 200 A) and all three CT sizes can be used on a single BCPM. Adapter boards with terminals for split-core CTs can be mounted using DIN-rail, Snaptrack or on a common mounting plate with the main board (42 ch Y63 models only).
- IEC Class 1 metering accuracy
  - Accurately monitor very low current levels, down to a quarter-Amp.
  - Easily differentiate between the flow of low current and a trip where no current flows.
- Class 1.0 system accuracy for Revenue Grade measurements
  - Branch Power and Energy measurements fully meet ANSI and IEC class 1 accuracy requirements with 50 or 100 A CTs included. No need to de-rate meter branch accuracy to allow for CTs. Voltage and current measurement accuracy is 0.5 % and currents are measured down to 50mA. Easily differentiate between the flow of low current and a trip where no current flows.
    - Class 1.0 system accuracy for Revenue Grade measurements
  - Branch Power and Energy measurements fully meet ANSI and IEC class 1 accuracy require
- Power quality: obtain basic power quality data thanks to the measurement of Total Harmonic Distortion percentages on voltages and current. (V L-L, V L-N, I L-N).
- Designed to fit any PDU or RPP design
  - Lowers your total installation costs as well as the cost per meter point by supporting both new and retrofit installations.
- Communicates with your various systems: BCPMA, and BCPMSCA have a Modbus RTU connection BCPME, and BCPMSCE, have a serial connection for either Modbus RTU or BACnet MS/TP. And there is an ethernet connection for Modbus TCP, BACnet IP and SNMP at the same time. Allowing the concurrent use of an Energy Management System, a Building Management System and an IT system.
- Compatible with PowerLogic power monitoring software
  - Easily turn the large amount of data collected by the devices into useful decision-making information.
- Flexible Configuration capability
- Set the ordering and orientation of CT strips, assign individual CT size and phases, support for 1, 2, and 3-pole breakers in any configuration.

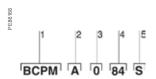

- PowerLogic BCPM
  1 50-pin ribbon cable connectors (data acquisition board).
- Auxiliary inputs.

#### Cabling and connection

Flat ribbon cables are recommended for use when the BCPM printed circuit board will be mounted inside of the PDU that is being monitored. Round ribbon cables are the prefered choice when the ribbon cable will be threaded through conduit.

BCPMSCA1S

BCPMSCxY63S 42-circuit split-core models come with the main board, (2) adapter boards and ribbon cables all mounted on a backplate, to simplify installation.

LVCT00050S

PowerLogic<sup>™</sup> LVCT0xxxxS Split-core Low-voltage (1/3V) CTs for Aux inputs (Mains) are ideal for retrofit applications

PowerLogic™ LVCT2xxxxS Low-voltage (1/3V) solid core CTs for Aux inputs (Mains) are ideal for panel builders (small, medium, large)

# BCPM part numbers for solid and split-core CTs (contd.)

| BCPM with split-core CTs |   |  |  |  |
|--------------------------|---|--|--|--|
| Commercial ref. no.      | Description   |  |  |  |
| BCPMSCA1S                | 42-circuit split-core power and energy meter, CTs and cables sold separately                          |  |  |  |
| BCPMSCA2S                | 84-circuit split-core power and energy meter, CTs and cables sold separately                          |  |  |  |
| BCPMSCA30S               | 30-circuit split-core power and energy meter, (30) 50 A CTs & (2) 1.2 m cables                        |  |  |  |
| BCPMSCA42S               | 42-circuit split-core power and energy meter, (42) 50 A CTs & (2) 1.2 m cables                        |  |  |  |
| BCPMSCA60S               | 60-circuit split-core power and energy meter, (60) 50 A CTs & (4) 1.2 m cables                        |  |  |  |
| BCPMSCAY63S              | 42-circuit split-core power and energy meter, all boards on backplate, CTs and cables sold separately |  |  |  |
| BCPMSCA84S               | 84-circuit split-core power and energy meter, with (84) 50 A CTs & (4) 1.2 m cables                   |  |  |  |
| BCPMSCE1S                | 42-circuit split-core power and energy meter w/Ethernet, CTs and cables sold separately               |  |  |  |
| BCPMSCE2S                | 84-circuit split-core power and energy meter w/Ethernet, CTs and cables sold separately               |  |  |  |
| BCPMSCE30S               | 30-circuit split-core power and energy meter w/Ethernet, (30) 50 A CTs & (2) 1.2 m cables             |  |  |  |
| BCPMSCE42S               | 42-circuit split-core power and energy meter w/Ethernet, (42) 50 A CTs & (2) 1.2 m cables             |  |  |  |
| BCPMSCE60S               | 60-circuit split-core power and energy meter w/Ethernet, (60) 50 A CTs & (4) 1.2 m cables             |  |  |  |
| BCPMSCE84S               | 84-circuit split-core power and energy meter w/Ethernet, (84) 50 A CTs & (4) 1.2 m cables             |  |  |  |

The PowerLogic  $^{\text{\tiny{TM}}}$  BCPM uses .333 V AC output split-core CTs for the auxiliary inputs. These CTs are ordered separately from the BCPM.
