Secure Mobile Access to  
Control Room Data

**Survalent.**

## Access Utility Network Data Securely - Anywhere, Anytime

Operating a utility network means that the unexpected can occur at any hour of the day or night. Since every second of network downtime represents lost revenue for the utility and added inconvenience for customers, your team must be equipped to respond quickly to any given situation.

SurvalentONE SurvCentral application leverages your existing WebSurv installation to generate read-only displays of SCADA data formatted especially for the small touchscreens of mobile devices.

Thanks to SurvalentONE SurvCentral, operators can view the latest network event on their smartphone or tablet and get to work on a solution right away, wherever they may be.

### Improve Response Time

With SurvalentONE SurvCentral providing mobile access to network data, your operations team can quickly activate valuable resources such as off-duty senior operators to help diagnose and manage an event, reducing the time between service interruption and restoration.

### Improve Operational Efficiency

Employees who are off premises no longer have to travel back to the control room to assess the state of the network. SurvalentONE SurvCentral also makes it easier for your operations team to collaborate at short notice because authorized team members all have access to the same data.

### Make Decisions Based on Firsthand Information

SurvalentONE SurvCentral helps managers stay informed about the latest network developments.

An up-to-the-minute picture of how systems are performing, where employees are focusing efforts, and how customers are affected improves operational decision-making in response to outages and other events that affect service.

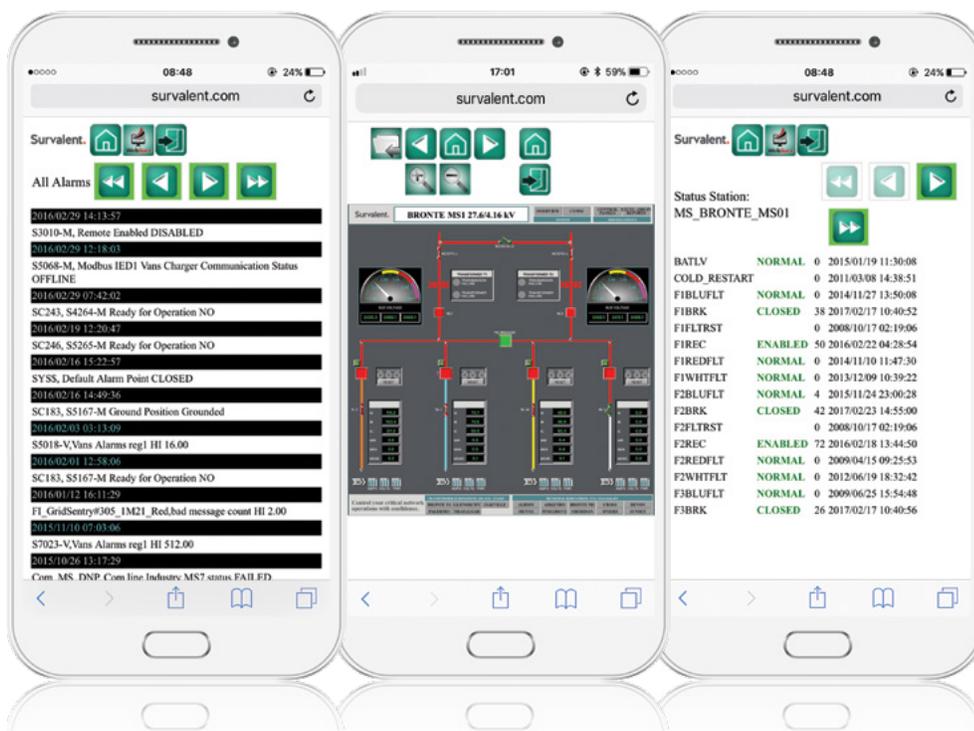

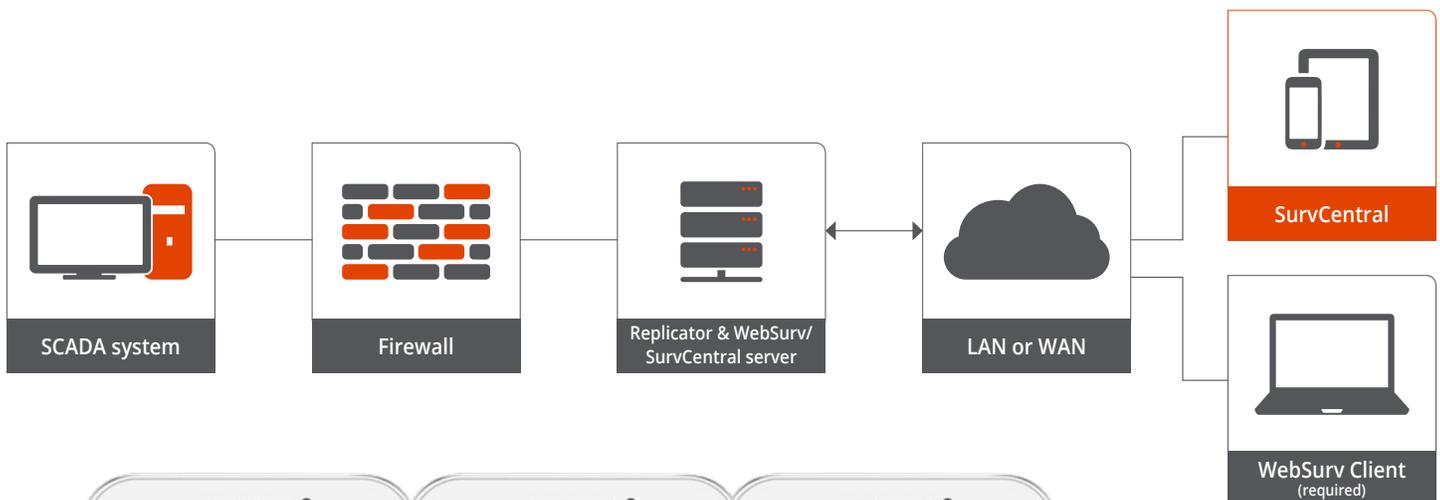

When an event occurs, they can instantly assess the situation on their mobile device and make an informed decision instead of relying on information relayed verbally over the phone by control room personnel – which may be incomplete.

### Benefits

- Ability to view SCADA data anywhere, anytime
- Heightened system security due to read-only access as SurvCentral connects to a replicated SCADA database instead of the production environment
- Faster response time to network events
- Increased collaboration and information sharing
- Timely, informed decision-making
- Increased operational efficiency
- Runs on any web browser that is HTML5-enabled device

### Key Features

- Secure login access
- Read-only, near real-time access to SCADA data via mobile devices
- Menu-based for quick navigation to desired section of website page
- Administrator tools that allow permission levels to be set on a per-user basis
- Ability to create and view custom reports on a per-user basis
- Control panel display optimization
- Optimized scaling display on mobile devices

Graphical & tabular data optimized for display on mobile devices.

## Control your critical network operations with confidence

With Survalent, you can control your critical network operations with confidence. We're the most trusted provider of advanced distribution management systems (ADMS) for electric, water/wastewater, gas, and transit utilities across the globe.

Over 600 utilities in 30 countries rely on the SurvalentONE platform to effectively operate, monitor, analyze, restore, and optimize operations. By supporting critical utility operations with a fully integrated solution, our customers have significantly improved operational efficiencies, customer satisfaction and network reliability.

Our unwavering commitment to excellence and to our customers has been the key to our success for over 50 years.

“Overall, we are very pleased with the software and ease of use as compared to our previous vendor.”

- Nolin Rural Electric
